RE: Abel-Moody 230 KV Transmission Project
1200 West Washington
Phoenix, AZ 85007

Dear Docket Control Center,

L-00000 B-07-0130-00132

I am requesting that you please do not install the proposed power lines along Rittenhouse and the railroad tracks but use the alternate, less populated routes or underground that have been proposed. We are in Nauvoo Station in the VIP Homes and have been here since Aug. 2008. One of the reasons we choose this area is so that we have a view of the beautiful San Tan Mountains. Also we feel Queen Creek is a lovely city with a country feel, safe and a good place to invest in. If the power lines are built we will lose it all, possibly our health, the view, the country feel, and the value of our home. Already in this economy our house has lost at least a third of its value. We are in our 60's and in no position to start over again.

Please do not run the power lines along Rittenhouse and the rail road!

Sincerely,

Larry Baumgardt
